WHEN IT COMES TO AN EMERGENCY, EVERY SECOND COUNTS.

You have little or no warning that an emergency situation is about to happen, it's therefore essential to be prepared.

The safety of your staff and visitors, plus security of your facility depend upon a swift response. **UNIGATEWAY X** alarm handler provides a simple solution. Should a scenario occur you'll be able to react quickly and calmly, discover false alarms, commence your phased evacuation or invacuation with the minimum of panic and maximum efficiency.

Connecting to your fire alarm, intruder alarm, BMS and call buttons, **UNIGATEWAY X** alarm handler immediately relays notifications to you and your team in real time. Automatically, following your predetermined alert strategy, warnings are sent to the right people at the right time for the quickest response – saving precious seconds.

No requirement for additional devices, **UNIGATEWAY X** utilises the reliable radio network for communication delivery, notifications can be sent through to your digital two-way radios and even via SMS to smart devices. Now with terminal alert, send discreet messages in the form of a pop-up window on workstation screens. This will appear, no matter what other programs they are using at the time, the message cannot be ignored - you can rest assured that the notification will not be missed.

4x Onboard Contact Closures (Easily expandable to 12 via a Brainbox ED-588 GPIO module)

4x USB 2.0 Ports

222,997

False Alam Calls requiring attendance by Fire Service*

TOTAL 566,572 call outs

346

Fire related fatalities*

3,297 non fatal casualties requiring hospital treatment

RS232 or RS485 Serial Port

Power Consumption: +5V DC, 2.6 Amps
Dimensions: 120mm x 110mm x 23mm
Din Rail Mountable

£1billion

Estimated losses per year attributed to false alarms*

Due to disruption and loss of productivity in businesses.

*Fire and rescue incident statistics: England, year ending Sept 2017

CONNECT
YOUR ALARMS

- Easily integrates with emergency and essential alarms, to deliver critical information.
- Simply connects to fire alarm systems, intruder alerts, BMS and technical/machine alarms.
- Connect, control and monitor your access systems; open gates, barriers and doors by sending pre-set radio messages from your two-way radio.

ALERT
YOUR DEVICES

- Two-way radio - Hytera or Motorola DMR Radio.
- Email – Network connection required.
- Workstation alert - Essential alarm notifications pop-up on PC's and terminals. Taking priority over the screens current contents.
- Smartphone – SMS text message requiring D-Link USB Dongle and SIM card.

ESCALATE
YOUR WAY

- Build your own tailored three stage alert strategy.
- Send a key word text from your two-way radio, mobile phone, call button press etc. to automatically start the alarm escalation.
- Automatically contact who you choose in the correct order of priority.
- Enjoy the peace of mind that an alert will not be missed.

SAVE
YOUR RESOURCES

- Full message detail, respond directly to the source of the incident in the quickest possible time.
- Discover false alarms, avoid unnecessary downtime and evacuation.

LONE WORKER
PROTECT YOUR TEAM

- Protect your workforce that work alone.
- Automatic 'alive checks' sent at regular intervals, no response and an alert is raised.
- Send a key word text from your two-way radio to automatically start and stop the Lone Worker timer.
- Simple activity report.

## WiFi CALL BUTTON
ALERT YOUR TEAM

- Smart, wireless call button. Simply send alerts and requests to Hytera and Motorola radios.
- Long and short press for different message, with LED feedback ring for confirmation.

TAKE CONTROL WITH REAL TIME CRITICAL INFORMATION AT YOUR FINGERTIPS.

UNIGATEWAY X easily integrates with your essential alarm systems; use your two-way radio to manage incidents and improve safety.

- Essential as part of your fire evacuation strategy.
- 24 Hour monitoring of remote and unoccupied buildings.
- No need for constant watching by the control room, alerts are delivered wherever you are in the format that suits you best.
- Reassurance that you can react quickly to keep your site, staff and guests safe. Respond straight to the source of the alert in the shortest time.
- Discreet Silent Alarm – Commence pre-arranged plans to ensure a safe evacuation, prior to activating a full general alarm.
- Delayed or localised alarm - Give trained personnel the chance to determine the cause, discover false alarms or contain the issue, before full unnecessary evacuation.
- Pre-Alerts – Know if an alarm condition is approaching, discover and mitigate potential issues, before escalating to a disruptive alarm state.
- Discover false alarms - Avoid unnecessary disruption that may affect your customer service or productivity resulting in downtime.
- Improved safety with reduced "alarm fatigue", desensitization staff and visitors experience from continuous exposure to frequent, often non-actionable alarms. Ie. false or technical alarm conditions.
- Greater control, open gates, barriers and doors by sending pre-set radio messages
